Smithsonian contributions to anthropology:
Vol. 1. Early formative period of coastal Ecuador, Valdivia and
Catalog No. SI 3.11: 1

This volume, the first of a new Smithsonian series in anthropology, describes in
detail the earliest pottery (circa 3000 B.C.) yet discovered in the
New World. It is the result of field research by Smithsonian staff members
in cooperation with other scientists, and is also based on collections in the
Smithsonian's Museum of Natural History. Its analysis of the pottery com-
plex indicates that this pottery was not a local invention. Comparison with
artifacts of other areas leads to the conclusion that it was a transplac-
tic introduction from western Japan. The subsequent development of this pot-
ttery in Ecuador is traced for some 2,000 years, and its possible spread to
adjacent regions is reviewed. Theore-
tical considerations underlying the data, numerous illustrations, and tables are also pre-
sented in support of the thesis.

How To Remit

The rules of this Office require that remittances be made in advance of shipment of publications, either by coupons, sold in sets of 20 for $1, and good until used, or by check or money order payable to the Superintendent of Documents. Foreign money is not acceptable. Do not send postage stamps.

Deposits of $25 or more are accepted against which orders may be placed without making individual remittances or first obtaining quotations. Order blanks are provided for convenience in ordering which will be returned showing the publications supplied, explanations regarding those not sent, the amount of charge and the balance on deposit.

No additional postage is required for mailing within the United States, Its possessions, Canada, Mexico, and all Central and South American countries except as hereinafter noted. For shipment to all other foreign countries, including Argentina, Brazil, British and French Guiana, South America, Dutch Guiana, and British Honduras, it is necessary to include an additional one-fourth of the total cost of publications ordered to cover foreign postage. Remittances from foreign countries should be made by international money order, or draft on an American bank, payable to the Superintendent of Documents.

Promptness in handling correspondence is insured by sending separate requests for information instead of embodying them in cash order. Full name, address, and ZIP Code should be given on request for additional information.

The Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, is authorized by law to sell copies of Government publications and to allow a discount of 25 percent to purchases of 100 or more copies of a single publication to be mailed to one address. A few publications are offered at a special low price and under special conditions, and for this group, no quantity discount can be allowed.

All authorized bookdealers, recognized as such by their order on a letterhead proclaiming their business or by a statement to the effect that their purchase is for the purpose of resale, are entitled to a 25 percent discount regardless of quantity. Regulations of this Office provide that purchasers will adhere to the public sales price set by the Superintendent of Documents in any resale of publications and that the publications shall not be overprinted with any advertising matter.
