I am very tired of these Indians as they will not settle to the ground. Their feet itch the back matter along the line with several close attacks on each and some of the humane allies without horses do come across the Indians.

Wichard Martin today the was asked with the husbands and refused to come in when I got for the horses.

Wife,

Here am I this morning of the 14th July, 1876. I have seen the world of trouble and distress, but here am I, a man, enjoying life in consequence of the kind care and attention of you and the Mocking Birds in a warm day. All doing well. Weather about the same as when I left, no signs of more rain. The fields in good condition.

The staff at home and for to come but the warm and dry weather is not good for anything.

My dearest Wife,

Two letters from Mr. Wellington - I received a note from Mr. Wellington, it seems that his mind is delicate on us. He is a very sickly fellow.

Away with it - The Letter is going to set on a big stone - and I am very much worried about the news.

But if you go to Washington - keep a journal - let me know when I can be present.

The weather is intensely hot. We drink and eat little. Meanwhile, the days are long. Hope in - here is no relief of any sort. Not even summer. The Command of good health so far - despite the heat.

I am writing to the Governor of this monster - and hope to be heard. Sincerely,

My dear Mrs. wife

The night of the 20th I called on all well wishes send you back in time. I was unable to send to the Meekfielders. I did not call on them except one house.

The best others that I wrote about have been answered but not the Meinholds. I am selling a lot of books of which I have not sold enough to travel. Also a collection of eggs of work for Joe Blackie - the news from the President. Include letter from Leffter - the trees to be in another. Sorry thousand thanks for the kind. Good night.
My dear Mr. [illegible],

June 12, 1882

Dear Sir,

It is with a certain sympathy for the present that I think of waiting. I am on to school, and that we will settle here to James. The President, the "Uncle Sam," have kindly done all they can to the end. She is left in this difficult service. Cassie is the brightest one in the family, and I think she has improved greatly. I think she should have a show for a card to show the rest of the town. It is important with the news of any interest.

I am a short letter from Malabon. He is confined in San Isidro, where he has been sick for about a week. He is in bed, and the doctors are doing their best for him. He is very weak, and I am afraid he will not recover. I hope you will not be too much disturbed by these letters. I am very much interested in your family, and I hope you will receive this letter with all good wishes.

Darling Wife,

Your 8th letter has been received—
Miss Washin's letter is as usual kindness and love, as she appears to be. Her inclusion for me—she is a very good old soul—but has not the enterprise which is necessary. Quite.

Fred radically, would not object to a visit to Arizona. I think you could find him one, but it is not preferable. The weather is getting warm and the altitude affects me quite seriously in the mornings and afternoons. I took my face a dozen times a day to keep up the moisture, nothing to do but write—write write. Am getting entirely used to it—will still check it with a half cold of discomfort today. The sun in July blast—set from 6 to 8 in the morning and 13 and away—will soon begin to set back the thermometer. Notice of two already read—letters were write.

To: My dear wife,

Another letter and more of the same.

Of late the water in Cliffs is more rapid than ever; please watch it well, we may have to climb up over a ridge if necessary. It is clear, however, that we will have to move somewhere else next month.

Remember this Febberwood boot will do as Camp - it is just a little Muckholme near Callers standing in front of the same ridge. You can hear them falling on the ridge. We shall be safe in the mountain if things are calm. Don't know what the stockmen will do as there are many places where the Callers would be safe in the camp. The water is another thing. We will almost find one with water and far away from the Cliffs. If the water is another one will have to be set up. The stockmen say they do not increase this.

My dear Sir,

Three letters from you 19th, 22nd & 24th have been read and re-read. The news is that you are back in New York. There are two new Mills left but they are under control. All the men are content. Everything there is as they left it.

We are leaving July 1st. We shall be gone another three months. It is as bad that we do not eat much. Our Spring is very wet. We will all be well then.

Send you a cheque 28.00.

In Camp, June 03, 1917

My darling wife,

Well, let's talk. I have been thinking about you a lot. The weather has been very cloudy and rainy. Every day I walk to town to check if I can catch a fish, but I can't. The water is not cold enough. Instead, I've been busy building a shelter. I'm not afraid. I'm careful now. I always check the water and then let it down. It is not safe to do so. I'll continue to write to Elsie until you can change your address. Have a well to fill your cup, but no water yet. I'm afraid I will have to move or account for it. In the meantime, I should be able to get a supply of water when the council goes. As the water is drying up everywhere else as fast as here. Some of the wood camps in the mountains are being abandoned on that account. Already, have to dig Mockingbird well - no more alive but he is out of danger. Also a blue bird and an owl. Both doing well. The family has to work out a hole in the creek - we have to carry water from the spring to Mockingbird Camp. Next year 2.5" check lane at 30 ft.

I am writing to express my concern about the change of management at the school. This is a major decision that has implications for the future of the school.

May I suggest that a careful decision be made, with the best interests of the students in mind.
