Susanville, California

Dear Norman:

I plan to weigh the Burgess Spring cattle before they leave the McClelland Ranch this spring. Will you please find out for me when Pierce intends to start them for Eagle Lake and when, before that time, he could get them up to the corrals for weighing. I'd like to weigh the cattle several days before they leave the ranch and would appreciate a week's notice, if possible, of a weighing date to permit my planing for the trip. An April 1 or later weighing would suit me best.

I would like to discuss Burgess Spring plans with you and P. D. and hope to find you in when I come up. Stan Brown will probably want to know about the weighing.

Sincerely,

A. L. NORMAY

May I have comments and suggestions from you and your grazing men on the enclosed Research Note. Tables and a graph comparable to those in Research Note No. 14, will be included in the processed note. I do not have extra copies of these at the present time and thought you could do without them in reviewing the highlights of the findings.

I would like to release this note in the next couple of weeks and your early reply would be greatly appreciated.

A. L. Hornay
