Office Memorandum • UNITED STATES GOVERNMENT

TO : A. L. HORMAY, Calif. Forest & Range  
Experiment Station  
FROM : FOREST SUPERVISOR - Lassen

DATE: May 14, 1948

SUBJECT: G - COOPERATION - Burgess Springs Experimental Range  
RR-MANAGEMENT - Ponderosa Pine Ranges - BSEP

Reference is made to our conversation at Westwood May 14.

Mrs. Jefcoat plans to have the cattle at Butte Creek on June 7.  
It will probably be the 8th or 9th before we can get them to  
Squaw Valley.

There is a chute at Butte Creek where it may be possible to put  
on the collars and tags if you wish.

Designation or Subject

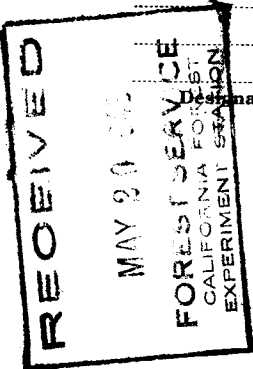

MEMORANDUM FOR A. L. HOOMAY

Mr. and Mrs Jefcoat came into camp today to see you about their cattle which you are to use for your experiments this season. They would like to know exactly when you expect the 26 heifers that are available. They do not know whether to bring them over and turn them loose on the open range or on the experimental range.

Am taking the liberty to write to you in their behalf, since I know that you probably want to ~~XX~~ weigh the cattle before they are turned out to pasture at the start of the season. I suggested that they wait until they heard from you. I asked if they could find out about the matter from Phil Lord, but they said that they had not been informed and that they would rather wait.

Will you write directly to Mrs Irene Jefcoat, Manton, California?

*D. Teske*

San Francisco May 18/48

Dear August

Enclosed find check  
for rent.

I have not been able to  
collect from Trotsman  
before us he lost 2 large  
accounts about \$1100.

He has now paid up to the  
15<sup>th</sup> Apr. and assures me  
he will be caught up  
soon

Sincerely  
J. G. Holy

RR  
MANAGEMENT  
Ponderosa Pine Ranges  
(Burgess Spring E.R.)

May 20, 1948

Mrs. Irene Jefcoat  
Manton, California

Dear Mrs. Jefcoat:

I just received word from Mr. Tackle at Halls Flat that you were in to make further arrangements for grazing a group of your cattle at the Burgess Spring Experimental Range this summer. I am sorry that I wasn't at Halls Flat when you dropped in.

Last fall Phil Lord told me that you had some cattle that could be used at Burgess Spring this year. I discussed this matter further with him last week. He was planning to get in touch with you about it shortly thereafter, and probably has by now. We appreciate your interest and cooperation.

The experiments this season call for the use of 27 head of yearling heifers. They will be grazed in three fenced pastures and weighed periodically throughout the summer to determine time and rate of gain. The gains in these pastures usually run over 200 pounds per head during the season.

Phil Lord sent me word that your main herd will arrive at Butte Creek about June 7. He and Ranger Hook plan to pick up the experimental heifers there and drive them to Burgess Spring around June 8 or 9. I would like to have the heifers tagged with individual numbers while at Butte Creek, since I understand you have a chute there. I have neck straps and tags for this purpose. They have been used successfully at Burgess Spring the last three years.

I expect to be at Halls Flat from May 27 to 30 and during the period from June 6 to 12. I will be on hand at Butte Creek when the cattle arrive and will bring the neck straps.

Sincerely,  
  
A. L. HORMAY  
Range Conservationist
