Your memorandum of May 31.

On May 27, 30 head of Mrs. Jefcoats' heifers were placed in the meadow pasture at Squaw Valley. Half of these will be put in the timber pasture as soon as the upper water development is maintained.

If any additional information is wanted, please let us know. The 30 head was the figure that Hormay gave us.

The season seems to be developing favorably so far. We have some very good results from last fall's re-seeding at Champs Flat which Mr. Cornelius might be interested in looking at the next time he is on the Forest.

By: PHILIP B. LORD, Acting
