February 1, 1972

Memorandum

To: A. L. Hormay, Range Conservationist

From: State Director, New Mexico

Subject: Range training session, March 7, 1972

The Range Management Workshop Committee of the New Mexico Section S.R.M. has scheduled the above-subject training to be held at New Mexico State University, Agriculture Building Auditorium, from 9:00 a.m. to 4:30 or 5:00 p.m., March 7, 1972.

They expect that the session will involve college students and local environmental groups as well as ranchers. The committee suggests that, if possible, you use more of an ecosystem approach rather than stressing your management systems. They would also like an outline of your presentation so that students can better program their time to attend the session.

The local arrangements committee in Las Cruces consists of Reldon Beck and Bob Steger of the University staff, and Fred Nunez, BLM Las Cruces District Office.

Please provide this office with a list of training aids that you need for the presentation and your arrival time in El Paso. We will send the information to Mr. Beck who will make necessary arrangements.

cc: Ray Swigert, Gila National Forest

TO: Gus Hormay

FROM: Hugh Harper

SUBJECT: Bitterbrush seed

DATE: February 2, 1972

Under separate cover I am sending you 15 pounds of bitterbrush seed today - courtesy of Keith Rudd of Idaho Fish and Game Department. Keith said the seed was gathered about August 1, 1971 adjacent to Lucky Peak Reservoir on the Boise River. This would be about 12 miles due east of Boise and at an elevation of about 3,000'. The seed was not completely ripe when gathered, but further drying was accomplished after cleaning. Since cleaning and drying, the seed has been stored in the Fish and Game Department equipment storage shed on their Boise Front property - a well ventilated building in which the seed was probably not subjected to temperatures exceeding 75°F. It has not received any chemical treatment against rodents or fungus, etc.

Keith took 150 pounds of this same seed, soaked it in water for 40 hours, dried it, and is now storing it for 40 days at 35° - 38°. He will plant it this coming spring as soon as he can get equipment on the ground.

Mr. August L. Hormay  
Range Management Specialist  
Pacific Southwest Forest and  
Range Experiment Station  
Berkeley, California 94701

Dear Gus:

How are you making it these days? Here I am, back in the saddle again, but in Redding, California. Transferred here March 8, 1971. They made me an Area Manager. Will wonders ever cease! My resource area includes those federal lands within Siskiyou County and a portion of Modoc County. We have almost completed the public presentation phase of our Management Framework Plan involving 40,000 acres of federal lands lying south of Dorris, California and the California portion of the Bryant Mountains. Jack Seley and I have been preaching rest-rotation grazing management to all agencies and individuals concerned with the area. Jack was formerly an Area Manager at Bakersfield. We used a Wells' Meadow slide series for an example during our presentation.

The resource area contains critical wintering ranges for the following deer herds:

1. Bryant Mountain Herd (interstate)
2. Jenny Creek Herd (interstate)
3. Mount Dome Herd
4. Scott Valley Herd

As you are well aware, current deer harvesting methods present to the rangeland manager a formidable challenge.

I am happy to say that we are making some headway with our rest-rotation management recommendations.

Since most of the area is rangeland and since adjacent agencies and private landowners are essentially in the same business, we feel there is a tremendous opportunity for cooperative-type management on a large scale.
In any event, we know that to most potential cooperators "seeing is believing". With this in mind I would like to request from you a number of slide series showing results of rest-rotation management in different areas throughout the western ranges. We would be grateful for reproductions of these series; either we could reproduce them or you could and send them to us.

You can be assured they would be put to good use.

Please, Gus, if you are ever in the Redding Area, drop in. I've thought seriously about putting in a request for a session to be held in Northern California but realize your schedule is more than likely filled up. However, I am going to try anyway.

Sincerely yours,

Bill Haight
The Trail Boss

"The Trail Boss" picture shown on the cover is reproduced from a pen-and-ink drawing by Charles M. Russell. The whereabouts of the original is unknown. That portion of the full picture which shows just the "boss" and surrounding foreground was registered as the trademark of the Society for Range Management on September 6, 1960.

"The Trail Boss portrays a man, a man willing to accept responsibility, and a man capable of delivering the goods in the face of adversity. The dedication of The Trail Boss to the herd makes it a fitting symbol of the range manager's dedication to animals, land, and people. Both The Boss and today's range manager are more than just cowboys."—Harold F. Heady.

HISTORY

On March 28-30, 1946, sixty-six representatives from various colleges and state and federal agencies met at Moscow, Idaho, for an Interagency Range Management Conference. As a result of the conference discussions, a committee—consisting of Tom Lomnasson, L. E. Spence, Wilton T. White, and J. F. Pechanec and Harold F. Heady (cochairmen)—was formed to inquire further into the type of an organization that rangemen wanted.

During the remainder of 1946 and the early part of 1947, this committee contacted many of the leading rangemen to seek advice on what course to pursue; the conclusion was that "...it is still questionable whether we can support a separate organization ... (but) we will never know without trying." Accordingly, a "temporary" range society was proposed and, on July 15, 1947, a letter was sent out to approximately 850 people, inviting them to join—with an initial $3.00 dues payment—and to vote for council members. The response was most gratifying; by the end of 1947, the interim council (B. W. Allred, D. F. Costello, F. G. Renner, George Stewart, L. A. Stoddart, and V. A. Young) was operating and arrangements were under way for the First Annual Meeting.

That meeting was held January 30-31, 1948 at the Hotel Newhouse in Salt Lake City (a single room went for $3.00!), and it provided the major impetus for later accomplishments during that memorable year: a name was selected (American Society of Range Management), a constitution and bylaws were approved, the first set of officers was elected, the first local section (Wyoming) was formed, and the first issue of the Journal of Range Management was published.

The new organization was incorporated in 1949 under the laws of the State of Wyoming. The first executive secretary, W. T. White, was employed on a part-time basis in 1952, with headquarters in Portland, Oregon. John G. Clouston became executive secretary in 1957 and, following his retirement, was replaced by Francis T. Colbert in 1968. In that year the Society's offices were relocated in Denver, Colorado.

As the result of a 1970 membership referendum, the name of the organization was changed to, simply, Society for Range Management, effective January 20, 1971. Later that year, SRM was recognized by the Internal Revenue Service as a scientific and educational public foundation for tax-exempt purposes.

Today SRM has approximately 4,400 members in 36 countries around the world, and the Journal of Range Management goes to libraries in more than 75 countries. There are 19 local Sections encompassing most of Canada, most of the United States, and all of Mexico. The Society maintains liaison with many other groups and is directly affiliated with the National Academy of Sciences-National Research Council, the American Association for the Advancement of Science, the Natural Resources Council of America, and the National Watershed Congress.

DEAR MR.

ENCLOSED IS TWO GRAZING SYSTEMS.

ONE BY THE FOREST SERVICE AND ONE BY ME. WOULD YOU PLEASE EXAMINE AND TELL ME WHICH ONE YOU THINK IS BEST FOR A THREE-PASTURE-REST ROTATION SYSTEM.

I REALIZE THIS WILL BE DIFFICULT WITHOUT SEEING THE RANGE AND KNOWING ALL THE CONDITIONS, BUT I HAVE A DIFFERENCE OF OPINION WITH THE FOREST SERVICE ON MY ALLOTMENT.

I WILL TRY TO GIVE YOU SOME OF THE CONDITIONS. IT IS A FOUR-MONTH SEASON 16th OF JUNE THROUGH 15th OF OCT.

FLOURING TIME IS AROUND THE 16th JUNE ON ALL OF THE LAND EXCEPT IN ONE PASTURE ABOUT 1/2 OF THE PASTURE IS HIGHER ELEVATION AND THE FLOURING TIME IS NOT UNTIL ABOUT 12th OF JULY. BUT IN THIS PASTURE I COULD USE THE LOWER AREA UNTIL FLOURING TIME BECAUSE THERE IS JUST A STEEP DEEP TRAIL
ON UP TO THE HIGHER COUNTRY AND YOUR GOING TO HAVE TO DRIVE COWS ON UP. COULD PUT A VERY SHORT STRETCH OF FENCE.

MY DIFFERENCE WITH FOREST SERVICE IS; ON THERE SYSTEM THEY WILL SEED THE PASTURE'S ONLY ONCE IN 9 YEARS IN MY PLAN YOU SEED EVERY THREE YEARS. I THINK MY PLAN (REALLY YOUR PLAN) WILL BE BEST FOR THE RANGE OVER THE 15 YEAR PERIOD BECAUSE I DON'T GO ON FOREST UNTIL FLOWERING TIME.

I WOULD SURE APPRECIATE YOUR OPION ON THIS MATTER PLEASE CALL COLLECT 801-587-2723 IF YOU NEED MORE INFORMATION. I JUST ATTENDED A ONE DAY SESSION OF YOURS AND I SURE ENJOYED THE SCHOOL. I THINK YOU HAVE DONE A GREAT SERVICE TO THE COUNTRY ON YOUR RANGE PLANS.

VERY FEW GOVERNMENT MEN KNOW WHAT IT TAKES TO MOVE COWS AND HOW THEY GRAZE. I THINK YOU KNOW BETTER THAN THE RANCHER.

YOURS VERY TRULY,

Melvin H. Dalton
P.S. I HAVE ENCLOSED A PLANT LIST AND ALSO ENCLOSED A MAP WHICH I HAVE DRAWN OUT THE BOUNDARY OF PERMIT (IN RED). I REALLY HAVE FOUR PASTURES, BUT THE FOREST SERVICE WON'T LET ME USE PASTURE NO. 4 ROBERTSON PASTURE ON THE MAP. I WOULD LIKE TO WORK OUT FOUR PASTURE REST ROTATION GRAZING SYSTEM. BECAUSE I DON'T THINK IT WOULD HURT TO GRAZ PASTURE NO. 4 EVEN IF IT IS ALL HIGH COUNTRY. IT HAS NOW BEEN RESTED 12 YEARS.

II
FEB 10 1972

Mr. A. L. Hormay, Range Conservationist
P. O. Box 245
Berkeley, CA 94701

Dear Mr. Hormay:

Recently we began making plans with Bill Ross, president of the Malheur County Livestock Association, regarding your presentation scheduled for February 29, 1972, in Vale.

Mr. Ross is very enthusiastic and wants to make the most of your visit. He requested me to ask if you would include an evening session for the purpose of discussing the benefits of livestock management to wildlife and other resources. Besides ranchers, he is also interested in attracting local sportsmen and wildlife conservationists to the program.

The Association and BLM have agreed to put out joint news releases. Attached are copies of the information we have for your biography. Please send us any additional information you feel we should have, along with a recent photo of yourself.

Also advise us of any equipment you will need, and if you desire, motel reservations in Vale or Ontario.

Sincerely yours,

[Signature]

Marilyn V. Jones
Acting District Manager

atts.
Mr. A. L. Hormay  
101 Acadia Street  
San Francisco, Calif. 94131

Dear Gus:

THANKS very much for your generous contribution toward the financing of a plaque for Sampson. The response so far looks good and we feel sure that we can develop an appropriate plaque for Sammy's very major contributions to range management.

The unveiling of the plaque will be at noon on the second day of the Sixtieth Anniversary observance being planned for July 28 and 29. We hope that you can plan to attend. Further information will be sent you regarding plans for this event.

With kindest personal regards.

Sincerely

Floyd Eyerson

Joseph F. Pechanec

It was nice to see you in Washington. Your welcome contribution was waiting for me when I returned.
February 17, 1972

Memorandum

To: District Manager, Vale, Oregon

From: A. L. Hormay, Range Conservationist, Berkeley

Subject: Range training session

In reply to Marlyn Jones' letter of February 10, 1972 about the range training session in Vale on February 29th, I would like to see all interests concerned with management of wildland resources attend the stockmen's session. I plan to discuss the benefits of livestock management to wildlife and other resources at that time.

I prefer not to hold a separate session for "other" interests, but I will be glad to participate in a question and answer period in the evening.

I am enclosing copies of a brief biographical sketch and two photographs of myself; also a list of the equipment I need in training sessions.

Please make motel reservations (single) for me in Vale for the nights of February 28 and 29. I plan to arrive in Boise 2:27 P.M. by United Airline 898, February 28. Kindly have someone from your office meet me at the airport.

Enclosures
SHIPPING AND BILLING RECORD FOR
PLANTING STOCK, SEED, AND/OR SUPPLIES
(Reference FSH 2472.1 R1, 350)

Ordered by

George Howe
Nursery prepares five copies of form prior to shipment. Instructions for each copy follow:

1. Original accompanies shipment--to be receipted at planting site; enter accounting data, including appropriation, account, function, and project numbers, in the space provided on the reverse, then forward to Supervisor's Office of receiving Forest as soon as possible. See FSM 6552.6 for nursery billing procedure.

2. First carbon accompanies shipment--complete reverse at planting site and forward immediately to Coeur d'Alene Nursery: Coeur d'Alene Nursery, Box 102, Coeur d'Alene, Idaho 83814.

3. Second carbon accompanies shipment--retain as District copy to aid in preparation of planting reports.

4. Third carbon--retain at Supervisor's Office, Coeur d'Alene National Forest; to be used as billing advice.

5. Fourth carbon--remains at nursery.

Refer to stock by lot number. Example: 16-2-122-4 65 means seed came from seed zone 16, subzone 2; 122 denotes ponderosa pine (national ADP code); 4 denotes 4,000 feet elevation; and 1965 was the year seed was collected. Reference FSH 2474.1 R1, 800 for ADP codes.

From: A. L. Hormay, Range Conservationist, Berkeley

Subject: Rest-rotation Grazing Management Training

I have been asked to participate in a meeting the week of April 3, 1972 by the Director. This necessitates changing the date of the next rest-rotation training session in Caliente - Mustang Allotment. I have rescheduled the session for March 28 and 29, 1972.

I have talked to Jim Brunner and A.K. Majors about this and the new date is satisfactory with them. Will the rest of you please notify Jim Brunner immediately whether or not you can meet the date. We will proceed with the training session as discussed in Monticello, even if one or two of you cannot be present.

A. L. Hormay

Note to J. Brunner:

Please let me know how many of the trainees cannot make the session.

ALH
MEMORANDUM

To       : Gus Hormay
          Jim Brunner

From    : Hugh Harper

Subject: RR Training - Change of Dates

A week-long Bureau-wide training session in fishery habitat analysis and management has been scheduled for the week of March 27-31 since last October. I must attend the fisheries session and therefore will not be able to attend the RR training now proposed for March 28 and 29.

In looking at my schedule and Gus's schedule, I could attend a RR training session on March 23 and 24 (travel time is available on March 22 and 25) or anytime during the weeks of April 10 or April 24.

Gus, in looking at your schedule for this current six months, you show two sessions with the Idaho Department of Lands out of Spokane, Washington, one for May 1-4 and the other for June 5-8. These are in addition to a session with SCS in Boise June 13-14. If these are correct and are to be as shown on the schedule, should the Idaho State Office advise Idaho Department of Lands, or do you take care of such notification?

Encl. 1
State Director

District Manager, Safford

Range Management Program Rest Rotation AMP

The Directors memo of February 18, 1972 on the above subject requested a short progress report each month.

On February 23rd August Hormay met with State and District staff at the Safford District Office to discuss and formulate a rest rotation grazing plan for the McEuen allotment (demonstration area). Following a discussion on principles and the District's proposal for a rest rotation plan, Mr. Hormay formulated a plan which modified to some extent the proposed District plan.

On February 24th Mr. Hormay, State and District personnel met with Gary McEuen, who manages the McEuen Ranch. The Rest Rotation plan was explained in detail and Mr. McEuen thereafter accepted (verbally) the grazing system. An average of 400 cattle yearlong has been run on this allotment; however, due to last year's drought, McEuen is down to 340 cattle and will not increase his numbers for the time being. We had hoped that the rancher could have started the grazing system with the licensed number before the plan was placed in effect.

Gus Hormay recommended that the District commence as soon as possible and rest one unit this growing season. This necessitates a request from the District for additional moneys for fencing and water development prior to July 1, 1972. Within the week, we should have the job estimates and will forward a formal request for additional funds. Unfortunately, we are committed to other projects and cannot divert existing funds at this late date.

Our next progress report will deal in greater detail the funding and timetable to have an implemented rest-rotation plan.

Climatic Conditions

The last recorded rainfall was on December 31, 1971. At Safford a total of 1.04 inches was measured for the month of December; normal is .87 inches.
No rainfall has been recorded at Safford during January and February. This set a 44 year record for January, a 26 year record for February and a 48 year record for both months.

The above dry conditions in January and February prevail throughout all stations in the District.

SUBJECT: Rest-Rotation Grazing Management Training

The dates of March 28 and 29 are satisfactory to me. I would not be able to attend if the training was held the week prior to this as I have to be in Reno for a watershed meeting.
