Breakfast Fresno 80
Lunch Gilroy 58
Car Storage 70
Arrived Berkeley 3:30 PM
in Gov Car #16 club car
US 41 36 x 48
Account signed 1/21/31
San Francisco Calif, Nov. 29, 1911
Location: Presidio Park Site above
quarry enclosed by Hoffman
Worx, 25 and Apple, 27 St.S.

Set out one plot for the purpose
of trying to establish vegetation closer
in a part of the area of soil which
is entirely shooting and if left alone
will not become neglected for
a long period of time and at the
same time will be deeper
scarred by shooting gallery.

Condition of area to date
Grooves of surface shot, soil
present from 1 to 10 ft. up hill
over entire area and show
1/2 to 2 feet deep. Shot came
also to 5 feet and a strong wind.
definite erosion pavement has
been established, but woody
vegetation is absent. N, E and NE
Vegetation:
The dominant plant on the
area is Hypochoeris radicata.
Other present in the order of
their abundance are:
- Achillea
- Lycium
- Rhamnus
- Echium
- Ferula
- Papaver (seeds?)
- Spergularia
- Stipa

Density of vegetation on area 0.02

Soil- No A horizon except in a
few spots.
Soil derived from shale and sandstone. Rocky loams

History. In an endeavor to draw out the mounds and depressions on the area and place after to establish a lawn, special seepers were used for the process of evening. Following the seepers more planting of lawn seed. Sandstone and the winter rains found the area bare of vegetation and the soil loose. Ground was worked after the first winter. The work was done in the summer of 1928 or 1929 and three rainy seasons have placed the area in a serious condition.
