STATUS OF REST-ROTATION GRAZING ALLOTMENTS

Supplemental information on each rest-rotation allotment:

1. Is the rest-rotation system in operation? Yes ___ No ___.

2. Date of start of first grazing season __________.  
   (Actual date for allotments under management. Planned date  
   for allotments not yet in operation.)

3. Is the form of management in effect or to be applied the same  
   as the one reviewed or suggested by Mr. Horney?  
   Yes ___ No ___. If not, supply the following  
   information:
   a. Diagram of grazing formula in use or planned.
   b. Map showing pasture layout.
   c. Map diagrams showing movement of livestock between  
      pastures for one grazing cycle.

In cases where rest-rotation grazing has been in effect for one year  
or more, please comment briefly on the prospects, merits or deficiencies  
of the system. It is a little too early to fully judge the system,  
but your comments will be helpful in pointing up future grazing  
training programs.

I have not been able to get on the ground with the licensee because  
of weather and time. I hope to work out the 3 pasture system as you  
suggested and will send the management plan to you for review as soon  
as it is completed.

Raymond T. Petersen
