Where system, other than continuous, was terminated after a period of use, give reason for termination.

To facilitate livestock distribution and minimize excess livestock movements.

Rest-rotation grazing systems used on allotment—Discisions

1. Present system
   Number of pastures 2 NATIVE

   Number of pastures:
   - a. grazed until seed-ripe and rested thereafter
   - b. grazed season-long
   - c. rested until seed-ripe and grazed thereafter
   - d. rested season-long

2. System that was revised
   Number of pastures 4 NATIVE

   Number of pastures:
   a. grazed until seed-ripe and rested thereafter
   - 2 (4-16 to 6-15 = 6-16 to 8-15)
   b. grazed season-long
   c. rested until seed-ripe and grazed thereafter
   d. rested season-long

3. System that was terminated NA

   Number of pastures: Number of pastures:
   a. grazed until seed-ripe and rested thereafter
   b. grazed season-long
   c. rested until seed-ripe and grazed thereafter
   d. rested season-long

2 of 2
Further detail for Eagle Rock Allotment:

1. Rest-rotation of the 4 Native Pastures began on this allotment in 1975. One of the 4 Pastures was rested each year. Periods of use were:
   1st year 4-16 to 6-15
   2nd year 6-16 to 8-15
   3rd year 8-16 to 10-31
   4th year REST

2. In 1978, the rotation sequence was changed to ensure re-seeding establishment. Periods of use were:
   1st year 6-16 to 8-15
   2nd year 4-16 to 6-15
   3rd year 8-16 to 10-31
   4th year REST

3. In 1982, 2 of the native Pastures were put under deferred-rotation while the other 2 native Pastures remained under rest-rotation as follows:
   Deferred-Rotation
   4-16 to 6-15
   6-16 to 8-15
   Rest-Rotation
   8-16 to 10-31
   REST

Also, two seeded Pastures were written in to be grazed under rest-rotation from 5-1 to 6-15. This was never followed. The seedlings are deferred-rotated: 5-1 to 5-25 and 5-26 to 6-15.

Where system, other than continuous, was terminated after a period of use, give reason for termination.

Rest rotation system was modified into a deferred rotation system in 1983 due to the inadequacy of the rest rotation system to meet the physiological needs of the plants in the mid seral condition range at the north end of the allotment. The seedlings in the middle of the allotment were not receiving adequate use under a rest system.

Rest-rotation grazing systems used on allotment — Descriptions

Where system other than continuous, was terminated after a period of use, give reason for termination.

From 1978 thru 1981, 4 pastures were available; therefore a 4-Past Rotation system. In 1982, one pasture was lost to desert land-ly. From 1982 thru 1986, a 3-Past. Rest-Rotation was in effect. In 1986, another pasture went to the USFS. Presently only two pastures under spring/fall deferred rotation system.
