+ Current Rest-Rotation system where one pasture is rested totally a full year is being considered revised. The old plan did not consider riparian areas, and concentrates settle in pastures with riparians during the hot season. Riparian areas continue to be degraded. Also, livestock performance has been poor. A deferred rotation plan is being considered that incorporates the principles of Rest-Rotation.

Rest-rotation grazing systems used on allotment - Discriptions

Reach hired a range consultant (Al Strozier) to make a ranch plan. His plan resulted in some pastures receiving every other year rest treatment and some in a deferred system. The plan based acceptable to us.

Rest-rotation grazing systems used on allotment - Descriptions

1. Present system
   Number of pastures 6

   Number of pastures:
   a. grazed until seed-ripe and rested thereafter
   b. grazed season-long
