HTML5 and CSS3: New Markup & Styles for the Emerging Web

Jason Clark
Head of Digital Access & Web Services
Montana State University Library
Overview

- Revolution or Evolution?
- New Features and Functions
- Demos
- Getting Started
- Questions
pinboard.in #tag

pinboard.in/u:jasonclark/t:plan2011/
Hello, My Name is...

- Background, Position
- HTML, Programming experience?
- Experience with CSS3?
- What do you want to learn most?
Does everybody know what these elements are?

CSS
- style rules for HTML documents

HTML
- markup tags that structure docs
- browsers read them and display according to rules

API (application programming interface)
- set of routines, protocols, and tools for building software applications
Links and Anchors

A link is the connection between one piece of hypertext and another.
Arcade Fire - The Wilderness Downtown
http://www.chromeexperiments.com/arcadefire/
HTML5 as "umbrella" Term

- Changes to HTML spec
- Additions to CSS spec
- New Javascript APIs
Evolution into HTML5

Reacting to how the web is used
A Minimal HTML5 Document

<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="utf-8">
  <title>title</title>
  <link rel="stylesheet" href="style.css">
  <script src="script.js"></script>
</head>
<body>
  <!-- page content -->
</body>
</html>
Semantic & Functional Markup

- header
- footer
- nav
- section
- article
- aside
- figure
- mark
- contenteditable attribute
Native Video and Audio

• simple markup
• no plugin!
• limited formats: .ogv, .mp4

<video src="turkish.mp4" controls></video>
Forms `<form>`

- field types - email, date
- validation
- regular expressions
- still need to watch for security/hacks
<form> Markup

<input type="email" required>
<input type="date">
<input type="url">
<input type="email" required autofocus>
Canvas `<canvas>`

- create graphics, images, games, and visualizations by using the `<canvas>` tag to draw elements into the browser

- SVG
- No plugin
- Paired with javascript
Javascript APIs

Desktop programming for the web
Geolocation

- w3c API
- accurate
- supported in Firefox 3.6, Safari 4
File API, Drag & Drop API

- Uploading of files
- Drag & drop API in combination with a draggable attribute
History API

- Preserve the state of the page
- Enabling back button in client-side scripts
sessionStorage

- mega COOKIE
- Stores key/value pairs while page is open
localStorage

• mega COOKIE
• Stores key/value pairs that persist after page and browser are closed
You are not connected to the Internet.

Safari can’t open the page “http://www.apple.com/startpage/” because your computer isn’t connected to the Internet.

Network Diagnostics can help you solve network connection problems.

Network Diagnostics...
Offline Storage, Web Workers

- work without a connection
  - Cache manifest file
- SQLite database
- Google discontinued Gears effort
HTML5 right now? IE?

<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="utf-8" />
<title>HTML5 right now</title>
<!--[if IE]>
<![endif]-->
<style>
article, aside, dialog, figure, footer, header, hgroup, menu, nav, section {display:block;}
</style>
</head>
<body>
<!-- ready to roll with HTML5 now -->
</body>
</html>
HTML5 Working Example

Evolution into CSS3

Rethinking web displays and styles
Rounded Elements

- border-radius declaration
- smooth out your interfaces
- button effects
Gradients/Opacity

- no more background images
- transparency
Transitions

- Animation behavior
  - Scaling, fading, easing, etc.

```css
body {
  -o-transition: all .2s linear;
  -moz-transition: all .2s linear;
  -webkit-transition: all .2s linear;
  transition: all .2s linear;
}
```
Columns and Grids

• Layout and page structure
• Goodbye, Float?

ul#content {
  -webkit-column-count: 3;
  -webkit-column-rule: 1px solid #eee;
  -webkit-column-gap: 1em;
  -moz-column-count: 3;
  -moz-column-rule: 1px solid #eee;
  -moz-column-gap: 1em;
  column-count: 3;
  column-rule: 1px solid #eee;
  column-gap: 1em;
  display: block;
}
We landed on the moon and we left stuff there. A lot of it.

LATEST THING NEWS

New things discovered this week

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Media Queries

• switch stylesheets based on width and height of viewport
• same content, new view depending on device

@media screen and (max-device-width:480px) {…mobile styles here…}
Media Queries in Action

<link rel="stylesheet" type="text/css" media="screen and (max-device-width:480px) and (resolution: 163dpi)" href="shetland.css" />

Responsive Web Design, Ethan Marcotte
http://www.alistapart.com/articles/responsive-web-design
@Font-Face

- bring in fonts
- use any licensed TrueType (.ttf) or OpenType (.otf) font
- independent of machine it's being rendered on...
Demos & Examples

It's your call....
Demos

- YouTube HTML5 demo
  - http://www.youtube.com/html5
- 24 ways CSS3 demo

Episode IV

A NEW HOPE

It is a period of civil war. Rebel spaceships, striking from a hidden base, have won their first victory against the evil Galactic Empire.

During the battle, Rebels managed to steal secret plans to the Empire's space station, a large orbital weapon called the Death Star.
