

HTML5 and CSS3:

New Markup & Styles for the Emerging Web

Jason Clark

Head of Digital Access & Web Services

Montana State University Library

Overview

- Revolution or Evolution?
- New Features and Functions
- Demos
- Getting Started
- Questions

Hello, My Name is...

- Background, Position
- HTML, Programming experience?
- Experience with CSS3?
- What do you want to learn most?

Terms: HTML, CSS, API

Does everybody know what these elements are?

CSS

- style rules for HTML documents

HTML

- markup tags that structure docs
- browsers read them and display according to rules

API (application programming interface)

- set of routines, protocols, and tools for building software applications

Links and Anchors

A link is the connection between one piece of hypertext and another.

```
1 <title>Hypertext Links</title>
2 <h1>Links and Anchors</h1>
3 A link is the connection between one piece of
4 <a href=WhatIs.html>hypertext</a> and another.
```

Chrome Experiments

Arcade Fire - The Wilderness Downtown
<http://www.chromeexperiments.com/arcadefire/>

HTML5 as "umbrella" Term

- Changes to HTML spec
- Additions to CSS spec
- New Javascript APIs

Evolution into HTML5

Reacting to how the web is used

A Minimal HTML5 Document

```
<!DOCTYPE html>  
<html lang="en">  
<head>  
  <meta charset="utf-8">  
  <title>title</title>  
  <link rel="stylesheet" href="style.css">  
  <script src="script.js"></script>  
</head>  
<body>  
  <!-- page content -->  
</body>  
</html>
```

Semantic & Functional Markup

- header
- footer
- nav
- section
- article
- aside
- figure
- mark
- contenteditable attribute

Native Video and Audio

- simple markup
- no plugin!
- limited formats: .ogv, .mp4

```
<video src="turkish.mp4" controls></video>
```

Forms <form>

- field types - email, date
- validation
- regular expressions
- still need to watch for security/hacks

<form> Markup

<input type="email" required>

<input type="date">

<input type="url">

<input type="email" required autofocus>

Canvas <canvas>

- create graphics, images, games, and visualizations by using the <canvas> tag to draw elements into the browser
- SVG
- No plugin
- Paired with javascript

Javascript APIs

Desktop programming for the web

Geolocation

- w3c API
- accurate
- supported in Firefox 3.6, Safari 4

File API, Drag & Drop API

- Uploading of files
- Drag & drop API in combination with a draggable attribute

History API

- Preserve the state of the page
- Enabling back button in client-side scripts

sessionStorage

- mega COOKIE
- Stores key/value pairs while page is open

localStorage

- mega COOKIE
- Stores key/value pairs that persist after page and browser are closed

You are not connected to the Internet.

Safari can't open the page "http://www.apple.com/startpage/" because your computer isn't connected to the Internet.

Network Diagnostics can help you solve network connection problems.

[Network Diagnostics...](#)

Offline Storage, Web Workers

- work without a connection
 - Cache manifest file
- SQLite database
- Google discontinued Gears effort

HTML5 right now? IE?

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="utf-8" />
<title>HTML5 right now</title>
<!--[if IE]>
<script
  src="http://html5shiv.googlecode.com/svn/trunk/html5.js"></script>
<![endif]-->
<style>
article, aside, dialog, figure, footer, header, hgroup, menu, nav,
  section {display:block;}
</style>
</head>
<body>
<!-- ready to roll with HTML5 now -->
</body>
</html>
```

HTML5 Working Example

Evolution into CSS3

Rethinking web displays and styles

Rounded Elements

- border-radius declaration
- smooth out your interfaces
- button effects

Gradients/Opacity

- no more background images
- transparency

Transitions

- Animation behavior
 - Scaling, fading, easing, etc.

```
body {  
  -o-transition:all .2s linear;  
  -moz-transition:all .2s linear;  
  -webkit-transition:all .2s linear;  
  transition:all .2s linear;  
}
```

Columns and Grids

- Layout and page structure
- Goodbye, Float?

```
ul#content {  
  -webkit-column-count: 3;  
  -webkit-column-rule: 1px solid #eee;  
  -webkit-column-gap: 1em;  
  -moz-column-count: 3;  
  -moz-column-rule: 1px solid #eee;  
  -moz-column-gap: 1em;  
  column-count: 3;  
  column-rule: 1px solid #eee;  
  column-gap: 1em;  
  display: block;  
}
```

We landed on the moon and we left stuff there. A lot of it.

5 9 2 3 7

things left so far.

Media Queries

- switch stylesheets based on width and height of viewport
- same content, new view depending on device

```
@media screen and (max-device-width:480px) {...mobile styles here...}
```

Media Queries in Action

```
<link rel="stylesheet" type="text/css"  
  media="screen and (max-device-  
width:480px) and (resolution: 163dpi)"  
  href="shetland.css" />
```

Responsive Web Design, Ethan Marcotte

<http://www.alistapart.com/articles/responsive-web-design>

@Font-Face

- bring in fonts
- use any licensed TrueType (.ttf) or OpenType (.otf) font
- independent of machine it's being rendered on...

Demos & Examples

It's your call....

Episode IV

A NEW HOPE

It is a period of civil war. Rebel spaceships, striking from a hidden base, have won their first victory against the evil Galactic Empire.

During the battle, Rebel spies managed to steal secret plans to the Empire's
