Dear Mother

There are plenty of Xmas gifts below. I just seemed to have chosen too big a lot. They are merely 'stuffing'.

The coat is so sun-faded that after it came back from the dye shop it is worthless to me. The brown dress has a moth hole in a most unfortunate position & is much too short with no more goods. Besides its on its third make over -

My monte carlo (look for face cards and the monte carlo + mediterranean sea) and the ~~flowered~~ are both to the stage when they are only good for silk prices & the stockings - as usual they are my heaviest expense. If you can't use them in naps or any thing tell me to quit sending them.

Dear People,

When I said I probably  
would not find time to  
write, I really thought I  
would just the same —  
But oh how busy I have  
been - tonight as I was  
snatching a bite I realized  
a week end had come &  
gone again while no letter  
had found its way home  
wards.

1  
All I can say is — please  
forgive — I will not not to  
let it happen again.

My desk has arrived in  
town & will be up to my apt.  
to morrow — I am so anxious  
to see it.

I had a nice letter from  
Grace today, she is so happy  
in her plans. I am trying

to fix my schedule so that  
I may land at her place at  
least once this summer. Somehow

my schedule gets more filled up  
each year. Yet I do not  
know that I do such heaps

of good for my country. In  
fact when I am as tired as

I am right now I rather  
doubt it very much,

To morrow ~~the~~, I go down  
to the Poultry show at Manhattan

Here's a little dirt -

Dear People,

Isn't this cute and silly? I found it in a 5+10. Telling dirt however has its satisfaction. But the dirt I collect out here would not get you much back there.

Sunday I got to cleaning house - Law, knows the place needed it. I am out uncertain periods of time I come home - my desk is piled high. Of course the first thing I ~~do~~ always, is to sort. Part of the things stay at the office & part of them I bring down to the house. Perhaps I have company or go away quickly. The first thing I do is tuck ~~it~~ away. Well it was

N.D.  
they will all live together. I don't know.

Dna is here again. She is getting to be quite a member of the family. Now that I have two bedrooms it's nice to have another in the house.

I still cough but I am so much better. I got some dope called "Libradol" that certainly worked like a charm when all else seemed to fail.

Well we have had a Chinook and it is balmy out of doors. To night Bridger Range was a masterpiece. Sacajawea was white, white white. a little peak in front of her east a violet shadow on her side. All the pine trees on the lower slopes stood out black like trees in etchings.

getting to the point that I was going to have to rent one of the barns on the back of the lot or move out, since neither seemed advisable I decided to dig out, it was worse than the pup on the front of this paper. I turned up a couple of furnace fills.

In straightening about I came across the letters I had written home when first going to Idaho. I can not realize now that it was the same person or rather thing that seems so a part of me now and so much taken for granted could have ever seemed strange or queer. Now I can't see so much difference between Eastern and Western customs and folks. We are all great human family. The thing that

Here's a little dirt - struck me most in going over the letters was my vast amount of pep. Over and over again I said, "if pep and desire to do will get ~~the~~ me there I am sure I will make good." Where is all that pep? Ten years in extrusion sure takes a lot out of one. Of course it gives a lot to one too. I am sure I am more to beat now, I go on a tear every once in a while but after all things that use to seem very upsetting seem quite amusing and <sup>seem</sup> beside the point.

Les Dot's brother Mark just got married - He is 25 and surely is old enough. But he seems such an infant. The girl is nice and perhaps

Here's a little dirt →

Oh yes, mother - send Vi your poems  
She will love them as I do. I do  
not have many of them. I'd like  
more. I have them copied in a  
big fat volume along with some  
of Margaret Widener's & Robert Frost.

Since I must get a 6:45 train  
tomorrow morning I must beg off and  
go to bed.

In reading over the early telegrams,  
Dad & I find I refer to a fictitious "Victory  
Bill" - one of your fabrications I think  
that I want to have met. Well, I have  
not been introduced to him yet.  
His victory is surely not over <sup>me</sup>.

But since one of our girls that  
is about 6 months older than I  
got married the other day ~~she~~  
married a widower with one little  
boy. Who knows "Victory Bill"  
may still come along.

pairs they had at least three variables in each group. Why, it wasn't research at all, as I explained to Frischknecht, it was as if one had a cold + took Epsom salts, a hot lemonade a hot bath + went to bed early. The cold was cured. which factor could one attribute the cure to?

I have been reading, The Raven - the life of Sam Houston. It is very interesting. I think our U.S. history from the Revolution to the civil war very interesting all the way through.

While I am waiting for Sue I will start a letter, at least.

Well, I hear her coming right now, so I will finish this in Missoula. I am lucky to be driving with her instead of having to take the train. No, it was the man across the street that drove up.

I finally have my new suit done and on. Everyone likes it. and it will wear forever. I am sending you a snip of both the suit and the blouse.

now I think I will let them get me enough more and make a top coat, then I will be fixed for all weather.

I worry that I have not heard from home in over a week. The only thing that I can conclude is that things are better.

I used to think I was busy when I first came. But that seems like nothing now. My job grows faster than I do.

This past week Mr. Fischknecht, the poultry specialist from Utah, was in the state, loaned to the hatchery code people - for inspection. I went with him down to Miles City to visit the Turkey Experiment Station while he was in the state.

He like so many other Norwegians is good when it comes to personal contacts and organization work. But he wanted Mr. Marsden and I to go over some plans they are getting up for a Turkey Experiment at Utah. Both Stanley and I were pretty surprised at the unscientific flimsiness of it. They were running six pens - it was a habit - experiment - and at the six

Dear People,

I have a lot to do nevertheless I am going to steal a few minutes.

I was so happy with the nice fat letter from the whole family. Especial did it seem good to see the letter in my mother's hand. I am so glad that the Dr. says there is no reason that you will not be a well woman. We sure will all know it just a hard

as possible. And when I arrive  
in August you will all come to meet  
me. I don't know where the money  
is coming from to get home on. Just  
the same it will turn up.

Thank you so much for the  
interesting article on poultry photography  
had. I got a great deal out of the  
article and will file it. It  
would be quite an interesting occupation  
in itself and well paying too. I should  
think if one could make a name for  
himself. It is as the author suggested.  
A knowledge of the type + breed is  
imperative in order to know when the  
is standing correctly and showing  
itself off at advantage.

Oh such pretty spring goods

EN ROUTE at Falls

Dear People,

Now this train makes connections  
with #3 from Bozeman so one  
can go all the way from Bozeman  
to the Falls in one day. That  
is a great convenience, but  
nothing.

I am interested in all your  
plays & monologues, whether I hope  
something comes of them.

I was in Bozeman all  
this week except yesterday

when I had my first house  
building demonstration  
of the season.

The people always  
get a great kick out  
of building a chicken  
house. We had 16  
men yesterday & as  
many women. The  
woman prepared the  
picnic lunch & I  
bussed the men.

~~Now~~ During this  
past week I read  
"Turn of the Screw"  
by Henry James  
It is quite horrible  
though of course any  
thing written by James  
is perfectly done.  
Also I have  
read some of Poe  
and a bit of

be they should keep  
it too themselves -

Americans are much

happier than Europeans

Any way it is interesting

I had Lois & a  
friend of hers - Dr  
Gurghen up for

dinner one night. He is an  
Asst in the Vet Dept. An Austrian  
who has only been in this  
Country 4 years. He is quite  
interesting - I especially enjoyed  
his comments - comparison of  
American & European countries.

He says we are not as free as  
Europe. He says in Europe a man

dare express himself. He may  
run the risk of getting shot but  
that is all. In America we

much more effectively stop people from  
expressing themselves - that is - we  
take their bread & butter from them.  
I don't know but that is true.

Here it is Sunday again.

I don't remember who it is -

Some one that knows Regna is it  
not - Well anyway I would not  
have had time to look her up

meeting yesterday - Then was

invited to the Kauffmans today.

Mr Kauffman used to be a County

Mr. Kauffman had been out  
fishing so we had some nice "cut-throat"  
trout for dinner.

Your good letters were waiting  
for me when I arrived Friday night.

Thank you for the enclosure of  
the Olvo bulletin, Dad.

It was strange just this  
evening the Kauffmans were talking  
about "The life of Thomas Lawrence"  
I will have to try and get it myself

as I have not read anything of  
Michael Arden yet. I'll have  
to try one. But if you really want

to read one that is just chockful  
of murders, fires, whiskey + folks  
living with way one else read "Manhattan  
Transfer". Some book - you get

so hopelessly muddled you are sure  
you can never straighten out again.

I am glad to know you have started  
"Growth of the Soil" - I am anxious to know  
how you like it.

I had a letter from Gace.  
Her mother seems to be improving.  
Poor Gace is anxious to get back  
to get to the ranch.

I am awfully sleepy & as  
my bus starts at 8:00 A.M. I guess I  
will shut up sleep & pack.

It is very sad and pathetic about  
President Wilson is it not? To  
sacrifice two human lives through Presidency  
is a good deal for the span of 365 days.

I am indeed glad the reins of  
such a monstrous problem will never  
be entrusted to my hands.

This is about all the time I can  
spare this sitting so I will say goodbye  
with very best love,

Yours

Dear People,

I sent off the two knives  
& one spoon to you, Dad, Saturday  
that the rest may be regarded like  
it. It will be so nice to have  
silver to set my table with - The  
alloy ones I have at present begin  
to look so shabby.

So you are having zero weather  
back here. We have decided  
Montana is the banana belt  
of the U.S. as we have had  
very little severe weather this  
year.

We have a little snow here  
but it is dirty & worn looking.  
I was going to do some

sending back the lavender dress  
I feel quite sure I will never  
find time to make it over.

I am certainly getting  
horribly back in all my reading  
matter. I will have to take  
a week off.

Nothing terribly interesting  
has happened since last  
Sunday. I worked at Roman  
and Butte -

I have much to do at the  
office, so much in fact that I  
dread to start. But I must so will  
say goodbye

writing yesterday but I had so  
much to take care of about the  
house - I began washing at  
9 AM. & did not finish ironing  
until 9 P.M. By that time  
I was too weary to do anything  
else.

I washed the curtains I  
spoke of a while ago - But truly  
they are not nice enough to send  
home. So I will send the box  
of stockings & silk pieces - There  
is one dress silk & wool - don't know  
whether you can use it for pieces  
or not. It is fast use to make  
over for me because I no sooner  
get away from headquarter with  
nothing else to rely on & it beats  
out somewhere new. Also I

Dearest Mother:

I received father's letter this morning and was so sorry to hear you are not feeling any better than you are. <sup>Some how</sup> it seems as if things are horribly unfair. I can not see any reason why you should have to just suffer and suffer. If only mother nature would just let you get well how much good you could do for everyone. Some well people are so selfish and just think of themselves. I do wish that my work was so I could leave it and

come home to take care of you - But it isn't so I just have to stand the heart ache of being separated. Also I have not the money to come. The legislature only straighten matters out the last of January so I have not even been able to straighten out what I had to borrow to keep running until our warrants would be good. Nevertheless I can spare this little check which I want you to spend in something which will make sick days seem shorter - either flowers or victrola records or a pretty

lounging robe. Something that  
you can see me giving it to you  
& thereby bringing some joy.

It was 25° Below this morning  
when I came into the Falls  
and every tree in the park was  
"ridged inch deep in pearl" - it  
was beautiful to see - like  
walking through a crystal city.

I bought some material to try to  
make a dress that I can travel in -  
after getting it - seems sort of gay.  
But the material won't wrinkle  
that's the beauty of it and what I  
need.

I intend to make it some

thing like this

That's a beautiful

I am also sticking in a little  
picture trimmed off one of  
my bulling pictures - as I did  
not want to be in the Bulletin -

I will write again Sunday

Good Bye for now  
Please do not over-do

With deepest love

Yours  
Harriette.
